## **Road Maintenance Spring 2019**

The Village of Muenster is planning to complete roadwork on the Range Line road. During this construction work we ask residents to use the East entrance into the Village. Local traffic will be able to travel across the construction into Main Bay, Scott Bay and Phillips Bay. Construction on the Range Line is planned to begin the week of June 10<sup>th</sup>, 2019. We ask regular vehicle and pedestrian traffic to try to avoid this area during the construction process.

The Village of Muenster is also planning on applying a dust suppressant on various roadways within the Village. We will be applying GreenBond, a recycled vegetable oil based dust suppressant product. The dust suppressant will be applied following completion of the Range Line roadwork construction, (weather permitting).
